

August 11, 2024

After 20 incredible years of serving our community, it is with mixed emotions that we announce the closure of Huntsville Reproductive Medicine, P.C. effective January 1st, 2025. We understand the impact this may have on our patients and their families, and we want to assure you that we will continue to support you during this transition. We cannot accept any new patients after September 5th, 2024. Our current IVF series services are on track as scheduled, but we will not add new patients.

We understand the questions from current patients and are still fully staffed to answer questions and help direct each individual patient to the best path for your own needs. If you have any inquiries, **please allow our staff five business days to respond to your communication** as we shape recommendations to your specific needs. We are grateful for the trust you have placed in us over the years, and we are committed to ensuring that you have the support you need during this time. Thank you for allowing us to be part of your journey.

The HRM team respects your autonomy and decisions in your healthcare needs. All medical records are confidential and protected by federal privacy and security regulations. With your authorization, a copy of your medical records can be released to you directly or transferred to a physician of choice.

Our client families have a few options:

- You may have them emailed/ mailed to you
- You may have them sent to a physician you designate. (Please provide the name and practice address of that physician).

Signed medical release forms can be found on our webpage and returned to the office via fax (256) 213-9978, emailed to [patientpaperwork@hsvrm.com](mailto:patientpaperwork@hsvrm.com), or mailed to the office. **We will not be able to accommodate walk-in requests for records.**

**Our staff will need approximately 10 business days to retrieve and prepare the records.**

Providing the community with Reproductive care has been a privilege. Please know that we have greatly valued our relationship and wish you and your family the best of health.

Sincerely,

Andrew J. Harper, M.D.
